

Please do not eliminate AIR 1 from the radio stations. AIR 1 is not only a radio station but it has proven to save lives in the spiritual aspect and has become a place that many of the listeners, including myself, feel at peace and learn very positive aspects in life. The typical radio stations these days are filled with commercials and never touch upon religion or encouraging words. There is no other radio station that offers a good word or advice and thinks positively for the listeners. The public hears the christian music and short testimonies shared while driving which allows us to learn something new about God every moment. If you take off AIR 1, there is not other radio station that the public can listen to with the positive content they can only offer. Don't disappoint us by taking away AIR 1 if you know the importance it takes in many of the listeners lives. There's a reason why it's listener supported and it still sustains till this day.
